

## Agriculture Sector Development

### Senior Agronomist

Our client is one of the largest Agricultural Producers in Australia with growing farms in all states in Australia and Overseas in Morocco, China and Laos.

The search brief was to identify a Senior Agronomist with Citrus experience.

### Taplow Solution

A global search was commenced by the Australian partnership with the position description being forwarded to our 3 colleagues. Unfortunately, they were not able to identify potential candidates.

We searched in countries where Citrus is grown particularly South Africa and Canada.

3 potential candidates were identified 2 in South Africa and one in Canada who happened to be from South Africa.

### Outcome

As a result, all three candidates were interviewed by our partner and the candidate in Canada we forwarded. We also assisted the client in Visa applications etc.

As a result, the Canadian candidate accepted the role and with their family relocated to Australia in January 2025. The mandate took 5 months to complete to the satisfaction of the Client.

We have also completed work with this client in Morocco and China and maintained a strong relationship.
