

## Transformation in CIMT Sector

### Infrastructure transformation

The client required CIMT (Capitol Region IT, Medico and Telco organization) transform within their infrastructure department.

### Taplow Solution

The Interim Manager supports the transition/transformation of CIMT infrastructure on its journey toward a more mature and modern infrastructure.

This is done by focusing on:

- phasing out legacy/non-strategic technologies
- standardizing solutions across operating systems and servers
- consolidating solutions onto fewer platforms

Currently, this is being pursued through:

- exploring the possibility of phasing out Power/AIX
- supporting architects in establishing standards for the various domains
- investigating future virtualization platform options – setup

### Outcome

Taplow delivered a shortlist of candidates within 10 days, The chosen consultant delivered solutions for the final report, on modernizing the department to the client over a 6-month period.
